Fantasy back at its finest element I have seen men become Gods and I have seen Gods become dust... Magic pieces of armor have begun to rain from Lenova's skies, granting men God-like powers. Mountains move, lightning bends to command, and a man's future can be written in a book before it has even happened. In all this emerging chaos, teenage Finn SunRider holds only the simple goal of escaping his enslavement and exploring the world he lives in. Yet he has a problem—many problems in fact: -His mute friend has been kidnapped by a murderer whose greed is only limited by the amount of gems he can collect as a cloud above his head -The land is being conquered by a Sorceress and her golden Lich master who can create life at whim -And an ancient artifact with a hibernating power has grafted itself to Finn's arm, marking him a "Star-Child". Poor Finn has never experienced what free life has to offer (he doesn't even know what milk is) and now has ended up getting a lot more than he bargained for. -From flaming coal-coated vat-worms and two-directional streams to floating cities and underground pyramids, follow a fantasy journey of epic proportions!
