Privateer Tales – The Beginning is a boxed set of the first five books in Jamie McFarlane's exciting Privateer Tales series. Spacers have always had to grow up fast but when Red Houzi pirates attack Liam Hoffen's home, he has only moments to make decisions that will shape the rest of his life. According to his father, Big Pete, honor and courage are only words until you put your own life on the line for something you believe in. Liam and his friends will face that challenge time and time again. What would space opera be without exciting battles? The hallmark of every Privateer Tales episode is fast-paced action, whether that be hand-to-hand combat, ship-to-ship combat or enemy fleets mixing it up. The only guarantee is plenty of action.

Rookie Privateer – When you're old enough to finally become an Earth Mars citizen, everything should be perfect. Right? Not for Liam Hoffen. He's stuck on a mining asteroid called Colony-40, helping his father work a claim that will never pay out. His best friend, Nick James, is set for life in his family business. Liam just discovered that the girl he's known forever thinks he's pretty great and now she's leaving for the Mars Naval Academy.

Sometimes you have to lose parts of yourself to gain the stars, and Liam discovers that while it isn't easy to literally lose parts of yourself to the pirates who attacked your home, gaining the stars is worth everything.

Fool Me Once – Jamie McFarlane’s novellas and short stories introduce new characters and give deeper background to others. While Fool Me Once doesn't follow Liam Hoffen and crew, you won't want to miss the opportunity to learn more about important friends who we'll no doubt meet again. Celina Dontal just escaped eighteen months of captivity at the hands of Alexander Boyarov and his crew, members of the brutal Red Houzi Clan. That should have been the hard part. It was only the beginning. Parley – After fighting space pirates and rescuing a damsel in distress, nothing sounds better to Liam than shore leave at Puskar Stellar on Mars where he can reconnect with his girlfriend. But neither their newest crew member, Marny, nor the Mars Protectorate Navy is ready for them to spend much time relaxing. Their old nemesis, Harry Flark, found a new mining station to pillage and the crew of Sterra's Gift has been hired to transport a covert operative into Flark’s lair. This is the perfect opportunity to set things right if it helps to bring him down. The big problem comes when Liam and Nick discover Flark is expecting them and has no intention of letting them get away with their lives. Big Pete – Shot down behind enemy lines, all Marine Sergeant Pete Hoffen can think of is getting the remainder of his beleaguered platoon back to the extraction zone. But when a cocky, PITA lieutenant orders him to leave behind one of his own, he'll have nothing to do with it. There's a reason Liam Hoffen goes up against great odds in order to do the right thing. He learned from his father that sacrifice and honor go hand in hand. Smuggler's Dilemma – In Smuggler's Dilemma, the Red Houzi proves it is more than just a rag tag band of pirates. As a highly organized military that uses guerilla tactics in the main asteroid belt, they decimate defense mining colonies, leaving behind destruction and devastation.

Vanishing into the deep dark of space as quickly as they attack, no one can predict where or when they will show up, not even the great Mars Protectorate Navy.

Liam Hoffen and Nick James have returned from their last encounter grateful to be alive.
