An Anthology of True Crime stories headlined by the disappearance of Jessie Foster JESSIE FOSTER Like so many cases of missing people, the story of Jessie Foster has not ended, either happily or otherwise. Jessie Foster has been missing since 2006 and her sudden disappearance has people raising more questions than the world can answer. Many people point to her past and her shady companions, while other blame the mysterious city of Las Vegas for her missing status. Whatever the case, there leads that have been followed have all ended in dead ends. Jessie Foster was born on May 27, 1984, to Glendene Grant and Dwight Foster. They lived in Canada and spent a lot of their time in Calgary, Alberta. Jessie herself spent most of her teen- and adult-life living in Kamloops, British Columbia. Little has been said about her personality, career, and educational level. All we know is that she was a popular athlete and an honor roll student prior to disappearing. Jessie became missing officially in 2006 after living in Las Vegas for a little while.

However, like any missing persons' case, sometimes the most important pieces of information are hidden in the days, months and even years prior to disappearing. In Jessie's case, things did appear strange to family members and friends who were silently watching over her. THE MISSING BEAUMONT CHILDREN It was a warm summer morning on January 26, 1966, when the three Beaumont children left their suburban home to

celebrate Australia Day at the beach. The children regularly made the trip by themselves, so their mother felt at ease providing them with bus fare and sending them on their way while she visited and had lunch with a close friend. However, she would return home that afternoon to find that the children still had not returned. That morning would end up being the last time she saw her three children.
