Philton J. Bugsomer is a scholar of sociomatics in the 27th century.

With the time-grabber he'll be able snatch some Christians from the 1st century before they are killed by the Roman Gladiators. Bugsomer, despite the possibility of a time paradox, decides to replace those Christians with some round heads. But things don't got exactly as planned. Do they ever when time travel is involved? Also includes the story THE BREAKING OF JERRY McCLOUD. Jerry didn't want to bring his wife to this wild outpost without a stake --- but he turned sentimental when he was vamped by a skem!
