Am I a Man or a Woman? is dedicated to future generations of young people who will be spared the despair of not knowing who they are, and addresses gender identity disorder (GID), sexual orientation, and life. The first chapters look at forces that have shaped gender confusion since the dawn of man. The second part looks at the psychology of gender.

Introjection, the underlying process of gender dysphoria and homosexuality, treatment and prevention of GID are a few major topics in the second part of the book. The connections between psycho-logical and the psycho-spiritual or transcending components of individuality create a whole, a sphere of realities that lead to understanding and bringing lifesaving solutions to life-endangering gender problems. The last part, dedicated to healing, asks: "Why treat gender disorders or sexual orientation?" Understanding true identity creates a world without walls; confusions will be left aside as the dialogue is engaged by this book.
