This Book comprehensively covers all topics in Chemical Engineering and is meant for graduates in Chemical Engineering intending to appear in the written tests conducted by Universities/Institutions and various public sector undertakings.

This book in its present form has been designed to serve as an 'Encyclopedia of Chemical Engineering' so as to be a Ready Reckoner apart from being useful for all types of written tests and interviews. Questions of various types have been arranged subject wise and the answers are given at the end of the respective chapters. The present edition of the book is a step in the direction of offering a wide cross-section of examinees a comprehensive preparation package to help them in their quest for succeeding in the intended competitive examination.
