Does my toddler have autism? With one in 68 children being diagnosed with autism, this is the question many parents are asking.

'Autism in Toddlers' describes the early symptoms of autism and leads parents step-by-step through the process of diagnosis. Early intervention is pivotal for a child with autism. It can bring them out of their world of narrow interests and repetitive behaviors, expanding their capacity to learn.

The IDEA ensures that assessment and interventions are free to children with autism. This book includes:  
AUTISM AWARENESS  
SYMPTOMS OF AUTISM  
PARENTING A CHILD WITH AUTISM  
ADVOCATING FOR A CHILD WITH AUTISM  
HOW TO GET YOUR CHILD ASSESSED  
ACCOMMODATIONS AND MODIFICATIONS  
EARLY INTERVENTIONS FOR CHILDREN WITH AUTISM
