Do dreams really come true? Much to Aislen Walker’s dismay, they do. Like most young women, she only wants a normal life—to finish school, become a nurse, maybe even travel the world someday. But one night she has a terrible nightmare and watches helply as a young boy executes a man in cold blood. What she wants to believe is only a bad dream turns out to be an actual murder! Is this all for real? Is she just going crazy? Or is she, as her dead-beat dad tries to tell her, a “walker,” one with a special talent for crossing into different dimensions? If she believes him, she stumbled into The Stratum, a dimension run by powerful organization that manipulates and controls the real-world through it. And they really don’t like strangers wandering in, fouling up their plans or exposing their nefarious deeds. In the first episode of the Walker Saga, Aislen must decide what is true and what’s a lie, who she can trust and who she can’t and discover who and what she really is, in a reality where nothing and nobody is what they seem.

This. Is.

Pick up this page turner today! AUTHOR INTERVIEW This book doesn't really fit neatly into a typical sci fi or paranormal fiction genre. How do you classify it? It's true. Dream Walker is not traditional sci-fi, which explores the mechanical, three dimensional worlds, often uses space crafts and plausible technology. It isn't really paranormal fiction either, which is associated with vampires, ghosts, or fantastical creatures. It is actually Visionary Fiction a genre in which the expansion of the human mind drives the plot. It is driven by our more ephemeral, mystical experiences, phenomena that doesn't fit into the confines of logic, but can be explained through the new sciences of quantum mechanics and possibly string theory. Increasingly, we are discovering the power and limitness of the uncharted human mind. I wanted to create a parable of sorts that explored those ideas within the trappings of a conspiracy thriller. What drew you into writing this kind of novel? They always say, "write what you know." So for me, that meant writing the weird. I've experienced many extraordinary paranormal events in my life, from dream travels, like Aislen, to the haunting of my childhood home. I've even had the pleasure of a few of UFO sightings. As the years progressed, I began to experience psychic phenomena, such as premonitions, telepathy, clairvoyance and clairaudience. My traditional religious paradigm couldn't explain them, which sent me on a quest for knowledge and understanding. After twenty years of studying mysticism, holistic theology, philosophy and quantum theory, I wanted to weave those concepts with some of my own experiences. Who would enjoy this type of novel? People who love tv shows like Fringe, The OA, or movies such as Dr. Strange, Source Code, Inception, and the The Adjustment Bureau.
