Jane Pratt was out of work, running out of money and had little job prospects. When a stranger offers her a job that is too good to pass up, things begin to look up for the thirty-five-year-old. Peter Alden was a simple, hardworking man. A carpenter by day, and a shapeshifting tiger by night, he had his share of sleep nights as he fantasized about one woman who he couldn't get out of his mind.

When circumstances bring Peter and Jane together, it may seem like a fun fling at first. But, things aren't what they appear and soon enough they'll each be faced with a mystery. A mystery so strange that even in a time where humans and shifters live amongst one another, it still might be too hard to believe.
