From the ancient Genii of the Middle East to the Fairy Piper of Scotland, fairy-folk and spirits have appeared in every culture since ancient times. What most of these magical beings have in common are wisdom, energy and the power to enchant their human counterparts. This book allows mere mortals to know these remarkable qualities in ways that benefit personal development, help solve problems and even give a glimpse into the future. The pack contains a set of beautifully illustrated cards depicting over forty fairies. It works on the same principle as a tarot deck. Each card has a specific meaning, relating to the on that each fairy has to teach through their story. The companion book explains how to lay out the cards and then interpret them. It also provides information about each fairy, a story connected with that fairy, selfdevelopment exercises and meditation/visualization activities.
