As a virus wiped out the majority of Earth's human population, the survivors joined together turning to a new religion and forming the Order of Civilisation. It was soon discovered that almost all women had been rendered infertile, all except a small group of women termed breeders. Breeders were rare with only one in twenty born with the distinctive mark, indicating their ability to breed.

After The End is set three hundred years after the disaster and follows the story of Nicole a first time breeder. Expect romance, drama and adult content! Not suitable for under 18's.
