For those who wish to transcend the threshold of ignorance and enter into the gate of Awakening, this tome will provide the essentials for doing so. For if it is indeed true that the majority remain asleep through their short, pitiful lives, what then becomes of those who strive to remove such stagnation from their lives? Well, those individuals seek the path to Self-evolution, striving to fully Awaken to the nature of reality and that of the Self, to retrieve a personal renewal, a state of rebirth. And this is the central embodiment of this tome, wherein its inscriptive pages will cloak the Self with an ambiance of utmost Awareness, ultimately assisting one into decimating the limitations that previously held him in thrall amid the pursuit of power and understanding. This tome is a philosophy unto itself, providing hands-on contact for Self-metamorphosis to begin. Upon absorption of its pages, one will plunge within the deepest psychological depths of the psyche, embrace the seed of true knowledge that is often planted in the darkest parts, and learn to dispel fear through understanding, while aligning with the Self and thus finally Awaken.
