Is there a connection between a bomb blast meant to kill the presumptive Republican presidential nominee and a group of prominent men who played poker in Moscow years ago? What is Operation Long Shadow, and what does it have to do with the xWave--a new high-tech device that can receive and transmit data via brain waves? Frank Adams must discover why he and his former poker buddies are being targeted for assassination and finds a surprising ally in his ex-wife, Lisa Hawkes, a brilliant Russian linguist and CIA covert agent, to learn the truth in this international thriller.
