Most people would consider near perfect recall, an ability to crunch numbers that rivals a computer's, and an uncanny knack for predicting the stock market to be remarkable gifts. But for Kyle, those abilities also curse him to recall every moment of his horrible, abusive past. Searching for an escape, he takes his therapist's advice and leaves his finance job behind for a weeklong camping trip on a remote lake in Vermont. He's not sure how a week in seclusion with nothing but his own thoughts for company will be the reprieve he needs.

Then he stumbles across a man engaged in a pagan ritual and is drawn into mysteries he never dreamed existed, and realizes nature is more distracting than he thought.
